R vs Python for Data Science: Summary of Modern Advances

https://elitedatascience.com/r-vs-python-for-data-science ▼

11 Feb 2017 - Should you choose R or Python for Data Science? Thanks to recent advances made in both languages, you really can't go wrong with either.

Choosing R or Python for data analysis? An infographic (Article)

https://www.datacamp.com/community/tutorials/r-or-python-for-data-analysis ▼
12 May 2015 - or "I need a fast solution, should I go for Python or R?". In today's post, I present to you our new Infographic "Data Science Wars: R vs Python", ...

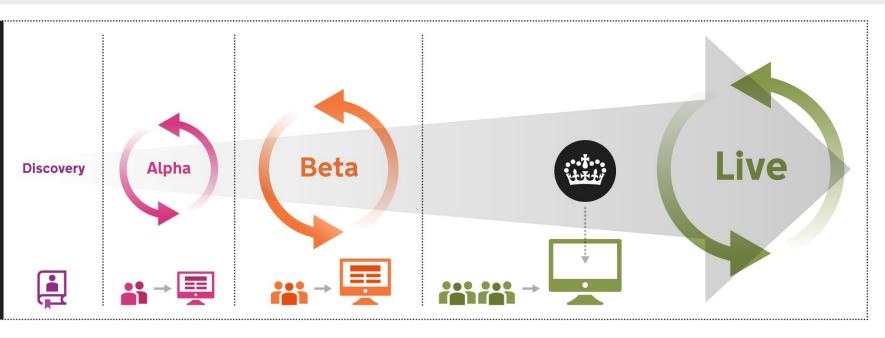

#DataOps

dataopsmanifesto.org

Data science is a team sport

a. Knowing about agile is helpful

agilemanifesto.org

b. You will need to work alongside other job roles (and speak a common language)

My team:

6x Data Scientist

2x Software Developer

1x Content Designer

1x User Researcher

2x Delivery Manager

1x Product Manager

2x Policy Analysts

Very technical

Less technical

c. Projects are often things (services, applications, digital products), not just ad-hoc analysis or models.

Getting buy-in and scoping: c. 40%

Data science: c. 20%

Handover and engagement: c. 40%

Analytics is code Make it reproducible

an example from government

The final **thing** is not the thing.

The code is the thing.

Code is easy to reproduce, things aren't.

DCMS Sectors Economic Estimates 2016

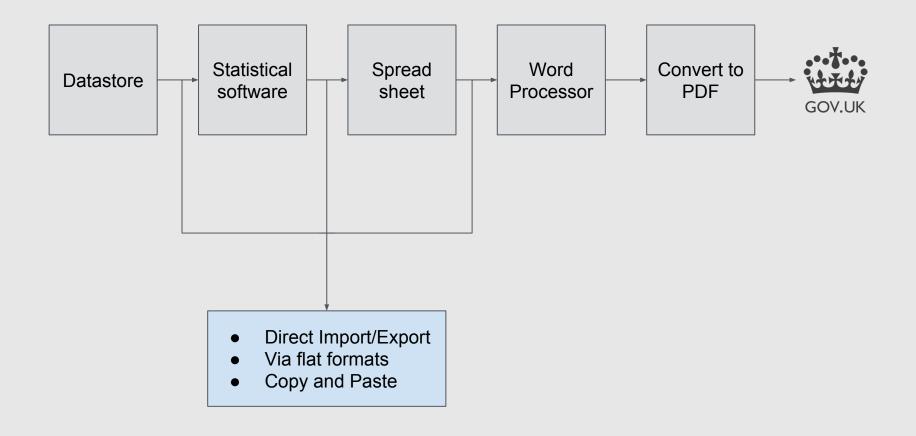

From: Department for Digital, Culture, Media & Sport

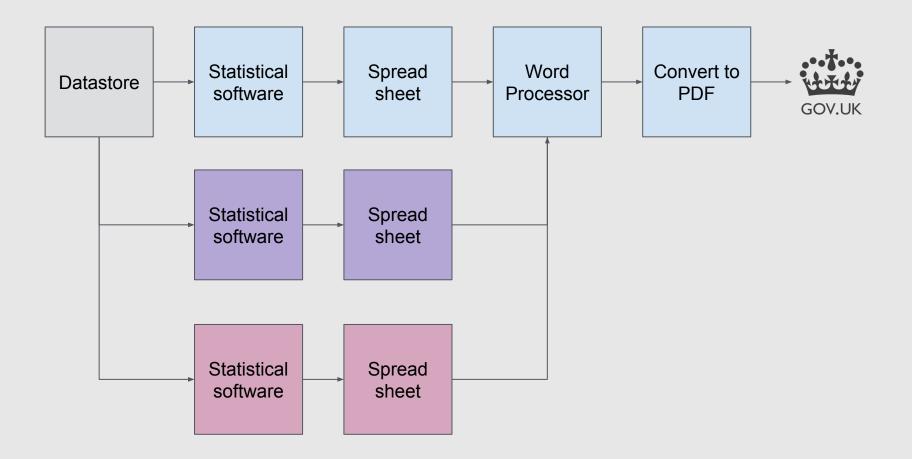

Part of: DCMS Sectors Economic Estimates, Tourism, Arts and culture,

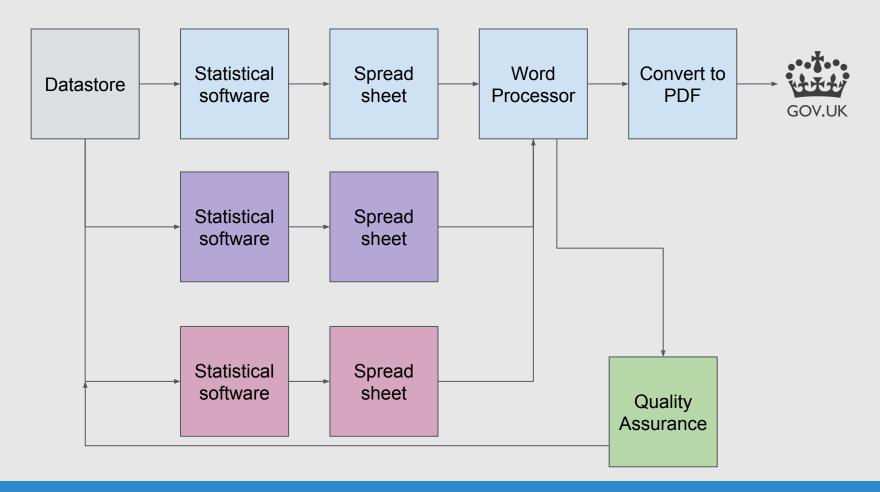

and Communications and telecomms

Published: 4 August 2016

Last updated: 1 November 2016, see all updates

Applying DataOps principles reduces production time by c. 75% and improves auditability and quality.

1. Remove all manual steps from data manipulation

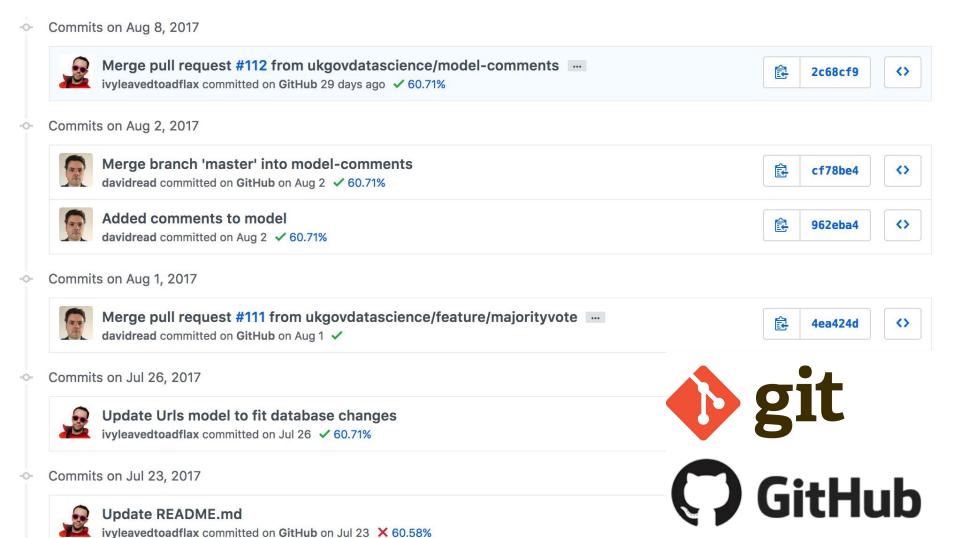

2. Version control everything

- pharmacy_analysis_version_3.R
- pharmacy_analysis_version_3a.R
 pharmacy_analysis_version_3a1.R
- pharmacy_analysis_version_3a1_MU_checked.R

This is not version

control

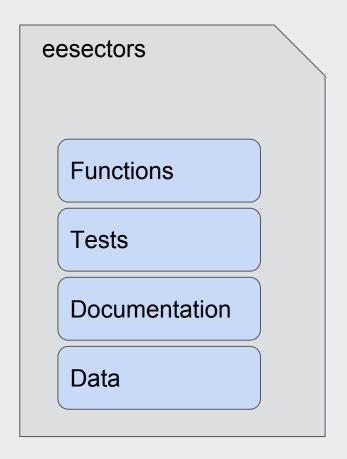

- pharmacy_analysis_version_final_checked_MU1.R
- pharmacy_analysis_version_final_final_checked_MU1.R
 - pharmacy_analysis_version_really_final_this_time.R

3. Write software, not scripts

http://r4ds.had.co.nz/functions.html

Put it into a package

4. Test the critical things over and over again (and automate it)

Data integrity

Does the data look right?

Unit tests

Does this bit of code do what I expect?

testthat for R

pytest for Python

End-to-end tests

Does the whole process work as expected?

Automate it!

- ✓ Pull Request #91 Fix typo in README
 - Commit 8a5e1ec ☑
 - \$\\$\ #91: Fix typo in README \(\mathref{Z} \)
 - Branch master
 - Matthew Upson authored and committed
 - ູ່າງ #703 passed
 - (1)° Ran for 16 min 46 sec
 - 21 days ago
 - Restart build

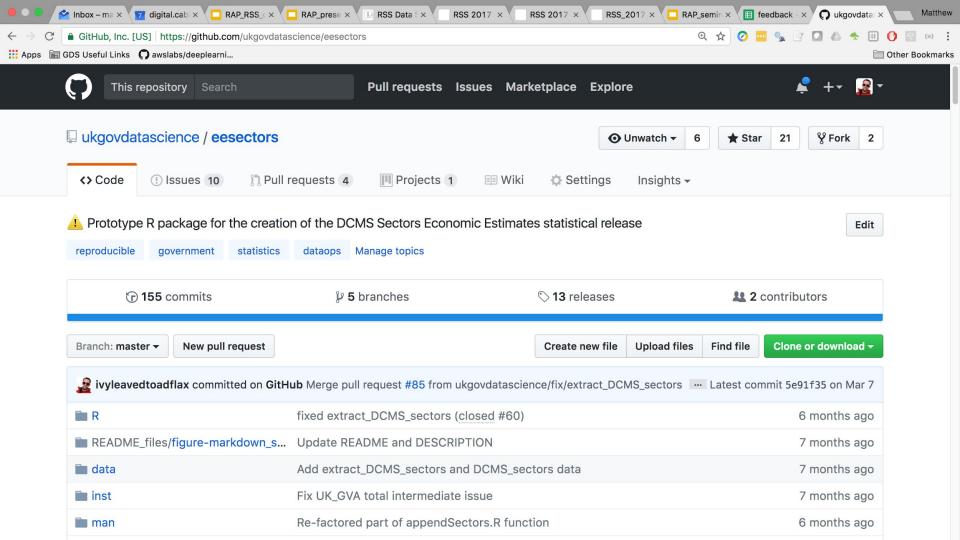

5. Test to see what you have tested (and automate that too)

'Code coverage' percentages

extract_GVA_data.R	100.0
extract_SIC91_data.R	100.0
extract_tourism_data.R	100.0
figure3.1.R	92.85%
igure3.2.R	93.18%
figure3.3.R	92.85%
maha_check.R	100.0
■ onattach.R	100.0
raise_issue.R	100.0

7. Combine the narrative with the code (and version that too)

6. Share what you have learnt
